Section D: Summary of Findings/Comments (Attach additional sheets of narrative and checklists as necessary)

Facility vacuums & brushes raceways 1-2x/week. Incubators & raceway effluent sent to pollution abatement pond for separation (settling) of solids before entering Icicle Creek. Stack towers remove H_2S before water enters rearing tanks. Sand settling tank working OK. Pollution abatement pond cleaned every 2 years. On 7/29/98 John Anderson Excavating contracted to clean. All water was not stopped during cleaning thus carrying some sludge out to Icicle Creek. Facility was instructed to clean it up.
